

MACRO SITE ANALYSIS

Site Location:
Jorissen St
Braamfontein,
Johannesburg, 2017

S

Educational : Proximity to Wits University → large, stable student population fuels local economy.

Cultural Identity: Rich heritage of resistance, art, and urban culture (graffiti, markets, music, festivals).

Connectivity: Strong transport links — Gautrain station (Park Station), taxis, buses, pedestrian access to CBD.

W

Crime & Safety Perceptions: Petty crime, especially at night, undermines its appeal.

Fragmented Spaces: Disconnect between heritage assets, cultural nodes, and safe public spaces.

Limited Green Space: Dense built fabric with very few parks or restorative areas.

O

Potential for design studios, coworking spaces, galleries, and cultural startups.

Inclusive Public Spaces: Potential to create safer, greener, more accessible gathering areas for multiple demographics.

T

Safety Concerns: Persistent crime may deter investment, tourism, and long-term residence.

Gentrification Risk: Rising rents could push out low-income residents and small traders.

Vehicle Accessibility

Green spaces

WITS University
Joburg theater
Nelson Mandela Bridge

Student Accommodation
Site

Wind Rose: Johannesburg (Typical)

Climograph: Johannesburg / Braamfontein

TYPES OF PLANTS THAT GIVE OXYGEN AND NOT TAKE AWAY

- * ARECA PALM
 - > HIGHEST OXYGEN-PRODUCING INDOOR PLANT, ACTS AS A NATURAL HUMIDIFIER.
- * PEACE LILY
 - > FILTER AIRBORNE TOXINS LIKE BENZENE AND FORMALDEHYDE
- * SPIDER PLANT
 - > EASY TO GROW, LOW MAINTENANCE, REMOVES TOXINS
- * ALOE VERA
 - > AIR PURIFIER, REMOVES TOXINS AT NIGHT
- * RUBBER PLANT
 - > CONVERTS CO₂ INTO FRESH OXYGEN.
- * IVY
 - > VERSATILE PLANT, CAN REMOVE AIRBORNE MOULD.

* MOTHERS TONGUE

- > REMOVES TOXINS, CONVERTS CO₂ TO OXYGEN.
- LOW MAINTENANCE.
- TAKES ALLERGIES

* FERNS (NOT SWORD FERNS)

- FEELINGS
- * CALM & RELAXATION
 - * SENSE OF CONNECTION
 - * INSPIRATION AND CREATIVITY

BIKE LANES

QUESTION

How CAN GREEN SPACES BE USED TO ENHANCE SOCIAL INTERACTION AND ENVIRONMENTAL SUSTAINABILITY THROUGH ARCHITECTURAL DESIGN.

IMPORTANT OF GREEN SPACES.

- * HEALTH BENEFITS
- * ENVIRONMENTAL BENEFITS
- * SOCIAL BENEFITS
- * DENSITY

ORGANIC SHAPES

GREEN SPACE DESIGNS

BRIDGE & COVERAGES

- WAY
- * URBAN DENSITY
 - * CLIMATE ADAPTION
 - * ECONOMIC GROWTH

allow light in and heat out. CO₂ eff. saving, glowing

PROBLEM STATEMENT

BRAAMFONTEIN IS A DENSE URBAN DISTRICT WITH HIGH STUDENT, RESIDENTIAL AND COMMERCIAL ACTIVITY. YET THERE ARE LIMITED QUALITY GREEN SPACES THAT ENCOURAGE PEOPLE TO INTERACT WITH EACH OTHER.

PRECEDENT STUDY

SINGAPORE'S GREEN HEART

LOOKED AT THE BUILDING'S ORGANIC FLOW AND COURTYARD SPACE.

GREENERY > SINGAPORE

CURVED ROOFS > FRANK GEHRY

THE FOUNDATION
LOUIS VUITTON

> the glazing 'sails' are supported by a steel and wood frame.

GLAZING PANELS

> CO-EFFICIENT RATING GLAZING.

- ALLOWS LIGHT IN, AND HEAT OUT.
- SOLAR HEAT GAIN COEFFICIENT (SHGC).

ROOF STRUCTURE

> CASTELLATED BEAMS

- EXCELLENT FOR CURVED ROOFS, EASE OF FABRICATION INTO SHAPES.
- STANDARD STAINLESS STEEL I-BEAM.
- HIGH STRENGTH-TO-WEIGHT RATIO. INCREASED DEPTH ENHANCES BENDING STIFFNESS, ALLOWING LONGER CLEAR SPANS WITH LIGHTER SECTIONS.

MATERIALS

> STAINLESS STEEL

- REFLECTS NATURE, VISUALLY EXTENDING THE GREENERY AND BLENDING BUILDING INTO ENVIRONMENT.
- ITS CORROSION-RESISTANT, AND MOISTURE-RICH
- STAINLESS STEEL 316 GRADE.

RAINWATER HARVESTING SYSTEM

C:\Users\dwetOneDrive\Documents\Design Brief 04 final.rvt

pls make this realistic render, keep everything the same, but pls add greenery to the building and to the landscaping, pls try to follow the greenery on the green and where there is water. pls add plants and aloe

pls do the same, but pls make the roof tunnel have some greenery

<https://chatgpt.com/c/68ebfccf-a97c-832a-8577-8065bbb9c163>

Water drip system

Diameter of the PVC pipe: Commonly 16 mm, but larger sizes like 19mm and 25mm are used for main lines

- Length:** Available in rolls from 100 to 500 meters.

Emitters (Drippers)

- Flow rate:**

- Measured in liters per hour (L/h). Common rates include 1, 2, 4, and 8 L/h. Low-flow emitters of 1 L/h or lower are available.

- Emitter type:**

- Can be pressure-compensating (PC), which deliver a consistent flow rate over a range of pressures, or non-pressure-compensating (NO PC).

- Spacing:**

- The distance between emitters on a drip line can range from 200 mm to 2000 mm or more, depending on the plant spacing.

Operating pressure: Systems typically require low pressure to operate efficiently.

Filtration: Essential to prevent clogging. Both a primary filter at the system head and a secondary filter at the field head are recommended.

Control: All valves for a specific area should be grouped together at the system head for easy management.

Fittings: Necessary for connecting components, such as Tees for branching, elbows for turns, end caps for the end of lines, and goof plugs to seal unwanted holes
